

ten23 health® and SHL Medical announce a strategic partnership agreement for integrated services.

Basel, March 25, 2024: ten23 health®, a leading Swiss Contract Development and Manufacturing Organization (CDMO) for sterile drugs, and SHL Medical, a world-leading provider of drug delivery devices, today announced their strategic partnership to provide a streamlined offering for pharmaceutical and biotech companies that require sterile drug/device combination products.

The partnership will allow SHL Medical to recommend and to integrate seamlessly with ten23 health® for drug development and fill & finish, final assembly and final product testing of SHL autoinjectors to customers seeking such CDMO services.

ten23's end-to-end offering includes formulation and process development, GMP fill & finish of syringes and cartridges, final assembly of autoinjectors and needle-safety devices, product testing and QC. The integration of ten23's expertise and capabilities with SHL Medical's autoinjector device technology will enhance the customer experience by guiding them through every step of the journey, from initial drug development to the successful commercialization of specific drug/device combination products.

"We are excited to partner with SHL, broadening our portfolio of device partnerships to deliver integrated patient-centric drug delivery solutions to pharmaceutical companies, tailored for their product needs," said Prof. Dr. Hanns-Christian Mahler, Chief Enablement Officer of ten23 health. *"The combination of strengths in this strategic partnership allows us to offer de-risked services and innovative and reliable drug delivery devices with clear patient focus."*

The collaboration will enable pharmaceutical companies to streamline their drug development processes and bring new therapies to market more efficiently by offering end-to-end solutions from drug formulation to final assembly of SHL Medical's flagship platform Molly® 1 mL and 2.25 mL. The partnership between ten23 health® and SHL Medical also

underscores their commitment to driving innovation in drug delivery and enabling greater independence for patients.

“We are pleased to collaborate with ten23 health® to complement our drug delivery offering with right-sized customer-focused solutions for small to medium assembly volumes,” said Ulrich Fässler, CEO of SHL. *“By working together, we can leverage our combined capabilities to deliver innovative and patient-centric drug delivery solutions that address the evolving needs of the pharmaceutical industry.”*

About SHL Medical AG

As a world-leading solutions provider of advanced drug delivery systems, SHL Medical is the partner of choice for many leading pharma and biotech companies. Driven by the company purpose – Enabling Patients’ Independence – they provide patient-centric solutions for the design, development, and manufacturing of autoinjectors, pen injectors, as well as innovative specialty delivery systems for large-volume and high-viscosity formulations. The company also offers final assembly, labelling, and packaging solutions for drug delivery systems. In response to the rising trend in home therapy, SHL has increased developmental work in the digital healthcare sector to help improve the drug delivery ecosystem. Located across Switzerland, Taiwan, Sweden, and the US, the global team of experts collaborate seamlessly as one team in utilizing our comprehensive in-house manufacturing capabilities. The company’s solutions offer customization and optimization for each project while proactively weaving sustainability-driven measures into designs and processes to contribute to a cleaner earth.

ten23 health®, located in Basel and Visp, Switzerland, is the human-centric and sustainable strategic partner of choice for the pharmaceutical industry and biotech start-ups: we develop, manufacture, and test modern medicines. At our two sites in Basel and Visp,

Switzerland, we support our clients in developing, manufacturing, and testing differentiated, stable, usable, and safe injectable treatment options for patients.

ten23 health® combines the latest scientific findings with proven and tested world-class industry and regulatory expertise to forge new paths to support our clients. We provide innovative services in a fair and sustainable manner, respecting people's health® and the future of our planet. ten23 health® is solidly financed through the long-term commitment of 3i Group, an internationally reputable equity partner.

About ten23's company's name

The numeric value for the number of molecules in a sample of one mol is called Avogadro constant and equals $6.022 \cdot 10^{23}$. Gram quantities of material contain the incredible number of 10^{23} atoms, which was an important discovery to understand the composition of matter: The world is built from small units, and not a homogeneous mass.
